

Building Science Training

Please join Canada Mortgage and Housing Corporation International Department and the Durango Sustainable Building Education Program for a building science training session with Justin Wilson of Building Performance Solutions, a nationally renowned green & building science speaker & trainer.

Durango Sustainable Building Education Program

WHAT YOU'LL LEARN

This session session will cover the fundamentals of building science, including designing and constructing buildings which incorporate airtightness, ventilation, heating and air conditioning techniques to efficiently manage heat, air and moisture levels. It will also cover practical skills regarding healthy and natural ventilation strategies to improve energy efficiency and building durability.

SESSION TOPICS WILL INCLUDE:

- Introduction to Green Building Concepts & Why it Matters
- Building Science Strategies to Optimize Ventilation and Heating & Cooling
- Air - The Invisible Building Enemy
- Energy Efficiency - Thermal Envelope and HVAC Improvements
- Moisture Management
- Indoor Air Quality
- Green & Sustainable - the Corner of the Next Green Revolution

FRANER

Our trainer, Justin Wilson, President of Building Performance Solutions, Inc. (BPS) is a highly experienced and renowned building science and green building speaker across a number of local, national and international building events.
